Related applications: [Dairy-based ingredients](#)

Emerging market demand for cheese around the globe highlights a positive shift in the way consumers are experiencing and incorporating this highly complex food into their diets. The question to be addressed is how to satisfy and sustain increasing demand in the future. This webinar will offer:

- A cheese manufacturer's view of current and future challenges
- An industry/academic cheese expert's perspective on what is available to address manufacturer challenges
- The story of how the processing of cheese by a leading cheese processor can enable greater success in a changing environment
