

## Fish health vital for profitable farming

The Zimbabwe Fish Producers' Association, supported by the Zimbabwe Agricultural Society, invites stakeholders in the fish industry and all fish producers to a Workshop and Fish Information Day on December 12, 2017.

This event will be held in the Andy Millar Hall, Exhibition Park from 8:00am and costs \$10 per person, inclusive of teas and a hot lunch. Topics include fish health and nutrition as well as an update on the fish industry and aquaculture strategy.

Following the watershed developments in aquaculture over the last two years, Zimbabwe is poised to develop the fish farming potential of the country. Like other livestock, fish will only achieve optimum growth rates when they are thriving and free from stress and disease.
