

Italian exports have grown during the first ten months of 2020 (+6.7%)

After analyzing Istat data, Fruitimprese reports that the foreign trade of Italian fresh produce over the first ten months of the past year confirmed the trend of prior months - a growth in value compared to the previous year (+6.7% equal to €241 million) with a drop in volumes (-3.3%). The value of exports exceeded €3.8 billion, while that of imports stopped at €3.5 billion. The balance was positive at over €322 million (105.4%).

ELABORAZIONE FRUITIMPRESE SU DATI ISTAT

The data reveals that lower quantities were imported (-0.3%), though value increased (+2.2%). Quantities imported (little over 3 million tons) once again exceeded quantities exported (2.8 million tons).

During the year of the pandemic, there was a recovery in the export of citrus fruit (+10.8% in value), fresh fruit (+6.9%) and vegetables (+5.3%). Citrus fruit was the protagonists of imports as well (almost

+30%), while there was a considerable drop in the import of vegetables (-14.5%). The value of tropical fruit imported decreased as well (-2.1%), while dried fruit saw an increase in both value (7.1%) and quantities (6.7%).
