Morocco

Food and Agricultural Import Regulations and Standards - Certification

FAIRS Export Certificate Report

Approved By:

Sarah Hanson, Agricultural Attaché

Prepared By:

Khalid Boukantar, Agricultural Specialist

Report Highlights:

This report identifies the major export certificates required by the Moroccan government to export U.S. food and agricultural products to Morocco. In 2011, the Moroccan food safety authority, Office National de Sécurité Sanitaire des Produits Alimentaires (ONSSA) issued new import requirements for dairy products, hides, skins, pet food, feed additives, and honey, and the import certificates for these products are still under discussion with USDA. In February 2013, the Ministry of Agriculture issued a new performance code for bovine semen imports. Sections I, II, III of this report have all been updated

Disclaimer:

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Rabat, Morocco for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Please contact this office, if you have any comments, corrections or suggestions about the material contained in this report at: agrabat@usda.gov

Section I. List of All Export Certificates Required By Government (Matrix) :

At the points of entry, the sanitary control and the conformity with the local regulations for food and agricultural products is carried out primarily by inspectors from the national office for food safety, Office National de Securite Sanitaire des produits Alimentaires (ONSSA) under the Ministry of Agriculture. In major ports (Casablanca, Agadir, and Tangier), the importer deals with one regional office, the Direction de Contrôle de la Qualité (DCQ) which became under the supervision of ONSSA, effective January 2010. The dispatch of the importation documents is done internally depending of the type of product (animal, plant, raw, or processed)

Typically, the clearing process by DCQ inspectors, under the ONSSA supervision, consists of up to three major steps based on the familiarity with commodity, importer's experience, and origin:

- a. The inspector clears the commodity by merely checking the documents provided.
 - o The inspector might require physical inspection of the imported commodity before clearance.
 - The inspector might require that samples of the imported goods be drawn and sent to local Government of Morocco (GOM) approved laboratory for analysis.

DCQ inspectors issue a certificate that authorizes the importer to clear customs. Customs officers will not authorize the goods into the country without a certificate issued at the point of entry by the DCQ inspectors.

For newly imported products, the exporter should provide extensive documentation (description of the products, lab analysis result, certification of approval by the government of the exporting country, etc.)

to help DCQ inspector make a quick decision and not request laboratory analysis. Some importers send samples of newly imported products to the DCQ office before they ship the products to get a feel of what would be required to swiftly clear customs.

Normally, it takes less than a week to clear products through customs. If a sample of food is taken for laboratory analysis, the customs clearance may be delayed several days.

In addition, the certificates that are typically required by customs office are:

- Bill of lading:

To ensure that imported commodities benefit from the preferential treatment under the Morocco-US FTA, the Moroccan customs require that the bill of lading explicitly indicate the U.S. as origin and Morocco as destination. For trans-shipments, U.S. exporters will likely be requested to provide evidence that the commodity was meant to be shipped to Morocco when it left the United States.

- Original invoice
 - Packing List
 - Certificate issued by regional quality control (DCQ) of the National Office for Food Safety ONSSA attesting that the commodity has been inspected and passed the sanitary control.

Certificate of Origin. Although under the FTA with the U.S. the certificate of origin will not be requested and the origin will be determined by the importer's declaration and accompanying documents (invoice, bill of lading, etc.)

Product(s)	Title of Certificate	Attestation Required on the Certificate	Purpose	Requesting Government Entity
Non Animal Origin Processed Food Products	"Certificate of Conformity" or "Certificate of Lab Analysis".	Chemical and Physical Laboratory Analysis Results of the Product. Product is suitable for food use.	Products content conforms to what is on the label. Especially useful for the first shipments for which Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.	Ministry of Agriculture, National Office for Food Safety (ONSSA).
Processed Food Products Containing some animal	Certificate of free sale (Wholesomeness) issued at State level	See model certificate # 1 developed by USDA and	Manufacturer is inspected periodically and is in substantial	Ministry of Agriculture National Office for

origin products (except beef)	where the product was manufactured.	Ministry of Agriculture	compliance with current good manufacturing practices and relevant FDA requirements. Certificates issued by the exporting companies are generally not accepted	Food Safety (ONSSA).
Food for Special use (Health food, diet food, food supplements, etc.)	“Certificate of Conformity or Certificate of Lab Analysis” Registration Certificate delivered by the Moroccan Ministry of Health	Chemical and Physical Laboratory Analysis Results of the Product. Evidence that the product has been approved and registered formerly by the Moroccan Ministry of Health.	Product contents conform with information on the label. Especially useful for the first shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing. and food additives		exporters should check with ONSSA regarding acceptance of previous certificate.		National Office of Food Safety (ONSSA)
Pet Food	Sanitary Certificate to Export pet food products to Morocco.	A new certificate is under discussion; exporters should check with ONSSA regarding acceptance of previous certificate.	Ensure that product is healthy and free of concern	Ministry of Agriculture National Office of Food Safety (ONSSA)

Section II. Purpose of Specific Export Certificate(s)

1. Non Animal Origin Processed Food Products

Name of the Certificate: “Certificate of Conformity” or “Certificate of Lab Analysis”

Purpose of the Certificate: Products content conforms to what is on the label. This is especially useful for the first time shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

2. Processed Food Products containing some Animal Origin Products (except beef).

Name of the Certificate: Certificate of free sale (Wholesomeness) issued at State level where the product was manufactured

Purpose of the Certificate: Product is freely sold in the U.S. and the manufacturer complies with U.S. sanitary regulations and requirements.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

3. Food for Special Use (Health Food, Diet Food, Food Supplements, etc.)

Name of the Certificate: Two certificates are required

- “Certificate of Conformity” or “Certificate of Lab Analysis”
 - Registration Certificate delivered by the Moroccan Ministry of Health

Purpose of the Certificate: Products content conforms to what is on the label. This is especially useful for the first few shipments. Detailed analysis is likely to prevent requirement by inspectors of local laboratory testing.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

4. Plants and Parts of Plants

Name of the Certificate: Phytosanitary Certificate according to the IPPC model.

Purpose of the Certificate: Certify that the plants or parts of plants are free of quarantine pests.
Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)
The phytosanitary certificates must be issued no more than 14 days before the actual shipping.

5. Apples

Name of the Certificate: Phytosanitary Certificate with additional declaration
Purpose of the Certificate: Certify that the plants or parts of plants are free of quarantine pests.
Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)
The phytosanitary certificates must be issued no more than 14 days before the actual shipping.

6. Tomatoes and Eggplants Seeds

Name of the Certificate: Phytosanitary Certificate with additional declaration
Purpose of the Certificate: Certify that the plants or parts of plants are free of quarantine pests.
Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)
The phytosanitary certificates must be issued no more than 14 days before the actual shipping.

7. Dairy Products

Name of the Certificate: Two Certificates are required:

- Sanitary Certificate issued by AMS/USDA See model #3 in Appendix
 - APHIS/USDA Certificate: Standard VS Form 16-4 with no additional declarations.

To avoid any complications at the Moroccan ports, please ensure that the date of the certificate issued by AMS is prior to the date of shipment. The date on APHIS certificate can be subsequent to the date of shipment.

The current certificate is still effective and exports from the U.S. are uninterrupted during the negotiation period to update the current AMS certificate.

Purpose of the Certificate: Ensure wholesomeness of the products and that the product complies with the existing U.S. food safety requirements and regulations
Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

8. Beef

Name of the Certificates: Several Certificates are required:

- Sanitary Certificate (Still being negotiated)
 - Certificate of Physical, chemical, and microbiological analysis
 - Halal Certificate
 - AMS/USDA Grade Certificate (if to be imported as Hilton Meat)

Purpose of the Certificates:

- Sanitary Certificate and Certificate of Physical, Chemical, and Microbiological Analysis: Ensure wholesomeness of the products and that the product complies with the existing U.S. food safety requirements and regulations
 - Halal Certificate: Animal slaughtered according to the Islam ritual
 - AMS/USDA Certificate: must be graded Choice to qualify for the “Hilton Meat” Tariff rate quota.

Requiring Ministry:

- Ministry of Agriculture, National Office for Food Safety (ONSSA)
 - AMS/USDA Certificate is required by Customs to grant the preferential access under the US-Morocco Free Trade Agreement.

9. Poultry Meat

Name of the Certificates: Several Certificates are required:

- FSIS Meat and Poultry Export Certificate of Wholesomeness as agreed upon with Moroccan Authorities (still being negotiated)
 - Certificate of Physical, chemical, and microbiological analysis
 - Halal Slaughter Certificate:

Purpose of the Certificates:

- Sanitary Certificate and Certificate of Physical, Chemical, and Microbiological Analysis: Ensure wholesomeness of the products and that the product complies with the existing U.S. food safety requirements and regulations
 - Halal Slaughter Certificate: poultry slaughtered according to the Islam ritual

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

10. Live Cattle - Purebred

Name of the Certificates:

- Exceptional Veterinary Sanitary Certificate for Import Of Breeding Cattle from the U.S. to the Morocco Kingdom of Morocco see:

http://www.aphis.usda.gov/regulations/vs/iregs/animals/downloads/mo_bo_br_hc.pdf

- Results of Laboratory Analysis
 - Performance Records

This certificate was agreed on exceptional basis and currently is under review by APHIS and ONSSA to make it permanent, though trade is not allowed

Purpose of the Certificates:

- Sanitary Certificate and Laboratory Test Results: Prevent import of animals with diseases of concern.
 - Performance Records: The Ministry of Agriculture has a minimum requirement of performance of the imported animals and their parents. Only some breeds can be imported into Morocco.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

11. Semen - Cattle

Name of the Certificates:

- Sanitary Certificate
 - Results of Laboratory Analysis
 - Certificate of Zootechnical Conformity

A new certificate is undergoing a review by ONSSA and APHIS, though semen imports using the current certificate have not interrupted.

Purpose of the Certificates:

- Sanitary Certificate and Laboratory Test Results: Prevent import of semen with diseases of concern.
 - Certificate of Zootechnical Conformity: The Ministry of Agriculture through its Division of Developing Production Sectors (DDFP), issued new minimum performance requirements of the semen donors and their parents. The Certificate of Zootechnical Conformity is mandatory for ONSSA's clearance process, and only semen of some breeds can be imported into Morocco.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA) and the Division of Developing Production Sectors (DDFP)

12. Equine

Name of the Certificates:

- Veterinary Sanitary Certificate for Equine Export from the United State to the Kingdome of Morocco see:

http://www.aphis.usda.gov/regulations/vs/iregs/animals/downloads/mo_eq_hc.pdf

Purpose of the Certificates

Sanitary Certificate and Laboratory Test Results: Prevent import of animals with diseases of concern. The proposed certificate by APHIS was accepted by the Moroccan National Office for Food Safety (ONSSA).

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

13. Honey and Bee Products

Name of the Certificates: Sanitary Veterinary Certificate For Import Of Bee Products into the Kingdom of Morocco

Purpose of the Certificates: ensure wholesomeness of the imported bee products

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

14. Milk Replacers / Calf Milk

Name of the Certificates: Sanitary Certificate for Import of Calf Milk and Milk Replacers into the Kingdom Of Morocco

Purpose of the Certificates: ensure wholesomeness of the imported milk replacers

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

15. Hides and Skins

Name of the Certificates: Sanitary Veterinary Certificate For Import Of Hides and Skins into the Kingdom of Morocco

Purpose of the Certificates: ensure wholesomeness of the imported milk replacers

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

A revised certificate established by ONSSA and imports are not interrupted

16. Hatching Eggs

Name of the Certificates: Sanitary Veterinary Certificate For Import Of Hatching Eggs into the Kingdom of Morocco

Purpose of the Certificates: Ensure that the imported product is healthy and free of diseases of concern.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

17. Day Old Turkey

Name of the Certificates: Sanitary Certificate for Export of Day Old Turkey to the Kingdom of Morocco

Purpose of the Certificates: Prevent imports of that are unhealthy or have diseases of concern

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

18. Turkey Hatching Eggs

Name of the Certificates: Sanitary Certificate for Export of Turkey Hatching Eggs to the Kingdom of Morocco

Purpose of the Certificates: Ensure that the imported product is healthy and free of diseases of concern.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

19. Fishery and aquaculture products

Name of the Certificates: Sanitary Certificate for Export of fishery and aquaculture products to the Kingdom of Morocco

Purpose of the Certificates: Prevent imports of that are unhealthy or have diseases of concern

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

20. Compound feed, Premix and food additives

Name of the Certificates: Sanitary Certificate for Export of Compound feed, Premix and food additives products to the Kingdom of Morocco

Purpose of the Certificates: Ensure that the imported product is healthy and free of diseases of concern.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

21. Pet food products

Name of the Certificates: Sanitary Certificate to Export dog and cat food products to the Kingdom of Morocco

Purpose of the Certificates: Ensure that the imported product is healthy and free of diseases of concern.

Requiring Ministry: Ministry of Agriculture, National Office for Food Safety (ONSSA)

Section III. Specific Attestations Required on Export Certificate(s)

1. Non Animal Origin Processed Food Products

Chemical and Physical Laboratory Analysis Results of the Product.

Product is suitable for food use.

2. Processed Food Products containing some Animal Origin Products (except beef)

See model certificate # 1 in Appendix developed by USDA and Ministry of Agriculture
Manufacturer is inspected periodically and is in substantial compliance with current good manufacturing practices and relevant FDA requirements

3. Food for Special Use (Health Food, Diet Food, Food Supplements, etc.)

See model certificate # 1 in Appendix developed by USDA and Ministry of Agriculture for products that are registered before the Moroccan Ministry of Health.

Manufacturer is inspected periodically and is in substantial compliance with current good manufacturing practices and relevant FDA requirements.

4. Plants and Parts of Plants

See Standardized IPPC Phytosanitary model.

5. Apples

Standard APHIS Certification: “This is to certify that the plants, plant product or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests, specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party including those for regulated-non quarantine pests.”

Mandatory Additional Declaration: Either Option 1 or Option 2

- **Option 1:** “The fruit was grown in a production area of the USA in which, on the basis of the official annual surveys, the Apple Maggot does not occur”
- **Option 2:** “The Fruit was inspected at the time of shipment and is apparently free of Apple Maggot”

AND

Documentation of a cold treatment that would meet one of the two treatment options:

- The fruit has continually been maintained at a maximum temperature of 0.0 degrees Celsius (32 degrees Fahrenheit) for a minimum of 40 days,

OR

- The fruit has been maintained at a maximum of 3.3 degrees Celsius (37.9 degrees Fahrenheit) for a minimum of 90 days.

6. Tomatoes and Eggplant Seeds

Certify that the plants or parts of plants are free of quarantine pests.

APHIS Phytosanitary Certificate must include the following Additional Declaration: “The seeds are free from..... *clavibacter michiganense* pv. *Michiganense* and *Ralstonia solanacearum*.”

7. Dairy Products

See Model Certificate # 3 in Appendix.

AMS/USDA Certificate: to ensure wholesomeness and that the product was produced according to U.S. regulations and standards.

APHIS/USDA: Products come from healthy animals.

8. Beef

Sanitary Certificate is being finalized by the FSIS and Ministry of Agriculture

Certificate of physical, chemical, and microbiological analysis: Show conformity of contents and microbiological status with Moroccan standards.

AMS/USDA Grade Certificate: Must be Choice Grade to qualify as “Hilton Meat” and be exported as part of the Tariff Rate Quota and used by specific hotels and restaurants)

Halal Certificate: Meat slaughtered According to the Islam Ritual.

9. Poultry Meat

Sanitary Certificate is being finalized by the FSIS and Ministry of Agriculture

Certificate of physical, chemical, and microbiological analysis: Show conformity of contents and microbiological status with Moroccan standards.

Halal Certificate: Meat slaughtered According to the Islam Ritual.

10. Live Cattle - Purebred

The updated certificate agreed upon by APHIS/VS and the Moroccan Ministry of Agriculture can be found at:

http://www.aphis.usda.gov/regulations/vs/iregs/animals/downloads/mo_bo_br_hc.pdf

Sanitary Certificate showing that the animals are free of some diseases of concern

Laboratory Analysis Results: to attest that the tests have been made.

The Minimum performance of the imported animal and her parent meet the specifications of the Ministry of Agriculture.

11. Semen - Cattle

See last agreed upon model at:

http://www.aphis.usda.gov/regulations/vs/iregs/animals/downloads/mo_bo_br_hc.pdf

There are minimum requirements on performance of the sires. Only some breeds can be imported into Morocco.

12. Equine

See Model Certificate # 9 in Appendix

Veterinary Sanitary Certificate has been finalized by the APHIS and the Moroccan Ministry of Agriculture (ONSSA), see :

http://www.aphis.usda.gov/regulations/vs/iregs/animals/downloads/mo_eq_hc.pdf

The animals were subject, with negative results, to tests carried out in blood sample.

13. Honey and Bee Products

See Model Certificate # 4 in Appendix.

14. Milk Replacers / Calf Milk

See Model Certificate # 2 in Appendix.

Addition of a chemical tracer is required (needs to be specified).

Contain no fat from animal origin (except those of butyric origin)

Contains no harmful residues in quantities exceeding the maximum accepted for human health.

Do not contain radioactive elements

15. Hides and Skins

See Model Certificate # 5 in Appendix.

16. Hatching Eggs

See Model Certificate # 6 in Appendix.

17. Day Old Turkey

See Model Certificate # 7 in Appendix.

18. Turkey Hatching Eggs

See Model Certificate # 8 in Appendix.

19. Fishery and Aquaculture products

See Model Certificate # 10 in Appendix.

20. Compound feed, Premix and food additives products

Sanitary Certificate proposed by the National Office for Food Safety (ONSSA)

To show conformity of contents with the Moroccan standards and requirements

21. Pet food products.

Sanitary Certificate is being reviewed by FAS/OASA and to reply to the National Office for Food Safety (ONSSA)

To show conformity of contents with the Moroccan standards and requirements

Section IV. Government Certificate's Legal Entry Requirements

ONSSA will accept only certificates issued by government officials. Certificates issued by federal agencies as well as by state government agencies are normally accepted and even if not explicitly required could help greatly the acceptance of the products. In most cases, certification issued by the exporting companies or by entities that are not accredited and duly authorized by the U.S. government (such as private labs) are not sufficient evidence to clear sanitary inspection.

Issuance Date/Duration of the certificates: There is a Moroccan regulation that explicitly requires that phytosanitary certificates (for fresh fruits and vegetable and live plant materials) be issued at most 14 days before loading. For certain animal products, the certificate must be issued at most 10 days before loading. For some commodities (such as dairy cattle, cattle semen) the duration of the certificate is determined by the date of the required tests on the animals/products, and thus the certificate would be valid only for certain periods.

For dairy products, although it is preferable that the date on the AMS certificate be prior to the date of shipment of the product, ONSSA in exceptional cases would accept certificate that are issued after the loading dates. Also, certificates that are too old (several months) likely will not be accepted by the port inspectors or, at best, will delay the customs clearance significantly.

Original of the certificates are needed by electronic and fax copies might be accepted to swiftly clear customs but the importer remains responsible for providing the original of the certificate.

Each shipment must have a separate sanitary certificate.

For goods transiting through Europe, a sanitary certificate issued by the U.S. authorities is required. If, originally the good was not specifically meant to be exported to Morocco, the sanitary certificate issued by USDA to the European Authorities can be accepted but an additional certificate certifying that the commodity has been properly handled and stored while in Europe might be necessary

Section V. Other Certification/Accreditation Requirements

The Moroccan office for food safety ONSSA does require for imported food products a radioactivity free certificate. A general certification statement from a federal/State agency about the reduced risk of having radioactivity in the imported products should be acceptable

Appendix I. Electronic Copy or Outline of Each Export Certificate

Model Certificate # 1: Processed Food Containing
Some Animal Origin Products (excluding Beef)

United States of America
Certificate of Free Sale – Food
Issued by the State of _____

LOGO OF CERTIFYING AUTHORITY

Certificate ID number: _____
Expiration Date of Certificate

Original Certificate

The Department of _____ regulates the production, manufacture and sale of the product(s) listed below in the State of _____ pursuant to the law, _____.

The Manufacturer(s) listed below is subject to periodic inspections in this state; the last such inspection showed that the plant(s), at that time, appeared to be in substantial compliance with current good manufacturing practices and relevant U.S. Food and Drug Administration requirements for the listed product(s). The Department does not object to the sale of the product(s) below, nor its shipment to any other state or country at this time.

AND, during the 30 days preceding its shipment, have been kept in an isolation facility / **les équidés ont séjourné dans les exploitations sous surveillance vétérinaire dans le pays d'expédition et, au cours des 30 derniers jours précédant l'expédition, ils ont été placés dans un local d'isolement avant l'exportation.**

E. The animal(s) have been protected from insect vectors that cause infectious diseases of equines, with insect repellents of proven efficacy (per manufacturers' instructions) during travel to the isolation

facility, while in the isolation facility and during travel from the isolation facility to the point of export / ***Les animaux ont été protégés contre les insectes vecteurs de maladies infectieuses équine, par un produit répulsif d'insectes dont l'efficacité est approuvée (selon les recommandations du fabricant) pendant leur transport jusqu'au lieu d'isolement, durant leur séjour dans celui-ci et au cours du transport jusqu'au lieu de chargement;***

F. The animal(s) come from premises that have not been subject to either quarantine or regulatory sanitary measures because of contagious diseases during the last 6 months. / ***Les animaux proviennent d'écuries qui n'ont été soumises ni à une quarantaine ni à des mesures de police sanitaire pour cause de maladies contagieuses durant les six derniers mois;***

G. The animal(s) have not been in contact with equines coming from premises subject to prohibition measures because of regulatory sanitary measures during the last 6 months. / ***Il n'a pas été en contact avec des équidés provenant d'une exploitation faisant l'objet de mesures d'interdiction pour motifs de police sanitaire.***

H. The animal(s) will be sent in a clean crate disinfected, with a product officially approved for use in the US, while under the surveillance of an official veterinarian of the competent authority. The crate will be designed to prevent deposit and/or fodder from leaking. / ***Les animaux seront expédiés dans des boîtes nettoyées et désinfectées au préalable avec un désinfectant officiellement approuvé aux Etats-Unis d'Amérique, sous la surveillance du vétérinaire officiel de l'autorité vétérinaire compétente et aménagé de telle sorte que les fèces, la litière ou le forage ne puissent s'échapper.***

III. TESTING AND VACCINATION

The animal(s) have been subject to tests in USDA APHIS National Veterinary Services Laboratories or in USDA approved laboratories (in the case of Equine Infectious Anemia and Vesicular Stomatitis) and in laboratories deemed acceptable to USDA APHIS Veterinary Services (for others diseases) and meet the following requirements / ***Les animaux ont fait l'objet des tests ci-après mentionnés dans les laboratoires nationaux vétérinaires de l'APHIS ou dans les laboratoires approuvés par l'USDA (dans le cas de l'anémie infectieuse et de la stomatite vésiculeuse) et dans des laboratoires dûment acceptables par les services vétérinaires de l'APHIS-USDA (pour les autres maladies) et satisfont aux dispositions suivantes :***

A. The animal(s) were subject, with negative results, to the following tests carried out on a blood sample / ***Les animaux ont été soumis, avec des résultats négatifs, aux tests suivants effectués sur un échantillon de sang.***

1. Coggins Test (immunodiffusion) for Equine Infectious Anemia, within 30 days preceding shipment. / ***Un test de Coggins pour l'anémie infectieuse, dans les 30 jours précédant l'expédition.***

Date of Sample (2) / ***Date du prélèvement(2) : _____***

2. IgM capture ELISA test for West Nile Virus Encephalitis, within 15 days preceding shipment. / ***Un test ELISA de capture pour anticorps IgM pour l'encéphalite à virus West Nile dans les 15 jours ayant précédé son chargement***

OR(1)/OU(1)

have been vaccinated against West Nile Virus Encephalitis more than 30 days, but less than 1 year, prior to the date of export./ ***ont été vaccinés contre la maladie de la West-Nile moins d'un an et plus d'un mois par rapport à la date d'exportation des équidés.***

3. ELISA, c-ELISA, virus neutralization for Vesicular Stomatitis Virus on a sample collected 12 or more days after the animal(s) enter the quarantine station, / ***Tests ELISA, c-ELISA ou neutralisation***

virale pour la recherche de la stomatite vésiculeuse, avec des résultats négatifs, effectués sur un échantillon de sang prélevé plus de 12 jours après leur introduction en station de quarantaine .

B. The animal(s) were vaccinated for Equine Influenza, according to the guidelines of the World Organization for Animal(s) Health (OIE) Terrestrial Manual, and have been subject to a booster vaccination at least 2 weeks, and at most 8 weeks, preceding shipment. / Les animaux ont été vaccinés contre les deux sous-types de virus de la grippe équine et ont été soumis à une vaccination de rappel 2 semaines au moins et 8 semaines au plus avant son chargement.

Date of the 1st vaccination and vaccine strain / **Date de la 1ère vaccination et souches du vaccin:**
_____ (2)

Date of the 2nd vaccination and vaccine strain / **Date de la 2ème vaccination et souches du vaccin:**
_____ (2)

C. The animal(s) were vaccinated according to manufacturer's recommendations against Equine Rhinopneumonitis / Les animaux ont été correctement vaccinés contre la rhinopneumonies équine conformément aux recommandations du fabricant.

Vaccination dates/**Date des vaccinations:** on/le _____ (2)and/et le _____ .(2)

D. Equine Viral Arteritis / Arterite Virale Equine:

1. Case of a non-vaccinated animal(s) / Cas d'animaux non vaccinés

It has shown negative results on a serum neutralization test for Equine Viral Arteritis at a dilution of 1 to 4, on a blood sample taken the _____,(2) during the 21 days preceding shipment. / **Ils ont été soumis, sur un échantillon de sang prélevé le _____(2) au cours de 21 jours précédant l'expédition, à un test de seroneutralisation pour l'artérite virale équine avec résultats négatifs à une dilution de ¼**

OR(1) / OU(1)

An aliquot of whole semen taken the _____,(2) during the 21 days preceding shipment, was subject to a virus isolation test for Viral Arteritis, with negative results. / **Une partie aliquote de leur sperme entier prélevé le _____, (2) au cours des 21 jours précédant l'expédition a été soumise à un test d'isolement du virus pour l'artérite virale, avec un résultat négatif;**

2. Case of a vaccinated animal(s) with regular booster shots / Cas d'animaux vaccinés avec rappels réguliers

It has been subject during the 30 days preceding shipment to two diagnostic tests for Equine Viral Arteritis carried out on blood samples taken at least at 14 days interval, demonstrating a stable antibody titer (less than 4 fold increase).

AND

An attestation of vaccination for Equine Viral Arteritis, administered within the year, is attached to the sanitary certificate. / **Ils ont été soumis durant les 30 derniers jours précédant l'expédition à deux épreuves diagnostiques pour l'artérite virale équine réalisées sur des prélèvements de sang effectués à au moins 14 jours d'intervalle, démontrant une stabilité des titres d'anticorps. L'attestation de vaccination contre l'artérite virale équine datant de moins d'un an est jointe au présent certificat sanitaire.**

Date of sample and type of 1st test / **Date du prélèvement et nature 1er test:** _____

Date of sample and type of 2nd test / **Date du prélèvement et nature 2ème test:** _____

E. The animal(s) have had no exposure to Contagious Equine Metritis (CEM), either directly, through coitus with an infected animal(s), or indirectly, by passing through premises where CEM has been reported / Les animaux n'ont pas été en contact ni directement par le coït avec des équidés atteints ou suspects d'être atteints de la métrite contagieuse équine ni indirectement par passage dans une

exploitation infectée;

AND / ET

Swabs of urogenital membranes of the animal(s), taken within 30 days prior to shipment, were subjected to the laboratory test for CEM (bacterial culture) with negative results. / ***Ils ont été soumis à une épreuve d'identification de l'agent responsable de la métrite contagieuse équine avec résultat négatif, réalisée pendant les 30 jours ayant précédé son chargement.***

Date of sample (2)/ ***Date du prélèvement:*** _____

F. Equine Encephalomyelitis (Eastern and Western) / *Encephalomyélite équine de l'Est et de l'Ouest*

The animal(s) have been vaccinated for Equine Encephalomyelitis (Eastern and Western), with inactivated vaccine on _____, (2) during the last 6 months but more than 30 days preceding shipment / ***Ils ont été vaccinés contre l'encéphalomyélite équine de l'Est et de l'Ouest, avec un vaccin inactif, le _____, (2) au cours des six derniers mois mais depuis plus de trente jours précédant l'exportation.***

OR(1) / OU(1)

The animal(s) have been subject to Hemagglutination Inhibition Tests relative to Equine Encephalomyelitis (Eastern and Western) twice, on blood samples taken at an interval of 10 to 14 days, the second test being carried out on a sample taken at most 15 days prior to shipment, on: _____ (2) and on: _____ (2) with negative results if the animal(s) was not vaccinated, or with no increase in antibody titer (4-fold or less) if the animal(s) was vaccinated over 6 months ago. / ***Les animaux ont été soumis à des tests d'inhibition de l'hémagglutination relatifs à l'encéphalomyélite équine de l'Est et de l'Ouest, à deux reprises, à l'aide d'échantillons de sang prélevés à un intervalle de 10 à 14 jours, le deuxième échantillon a été prélevé 15 jour au maximum avant l'exportation, le : _____ (2) et le _____ (2) avec des résultats négatifs s'ils n'ont pas été vaccinés ou sans accroissement des anticorps (d'un facteur 4 au moins) s'ils ont été vaccinés depuis plus de 6 mois. (1)***

G. Copies of the diagnostic laboratory reports are attached./ Les copies des bulletins d'analyses sont jointes audit certificate.

IV. CERTIFICATION

Validity of the Sanitary Certificate/ ***validité du certificat sanitaire:*** 10 days after the signature and should not have any erasure (in case of transport by ship, the time is prolonged by the time of the voyage) / ***10 jours après sa signature et ne comportant aucune rature (dans le cas d'un transport par bateau, la durée est prolongée pour tenir compte de la durée du voyage.)***

VIII. CERTIFICATION STATEMENTS/Renseignements sanitaires certifiés ci-après:

A. The United States is free of bovine spongiform encephalopathy (BSE), contagious bovine pleuropneumonia, foot-and-mouth disease, lumpy skin disease (contagious nodular dermatosis), and rinderpest in accordance with the standards of the OIE. / Les Etats Unis sont indemnes d'Encéphalopathie Spongiforme Bovine, de Péripleuropneumonie Contagieuse, de Fièvre Aphteuse, de Dermatose Nodulaire Contagieuse et de Peste Bovine conformément au Code Zoosanitaire de l'O.I.E.

B. No case of BSE has ever been detected in the United States. Report of BSE is mandatory in the United States and the country has an efficient system of surveillance for the disease. Cattle in the United States bear

Health Certificate No/ Certificat sanitaire N°: _____
(Valid only if the USDA Veterinary Seal appears over the Certificate No.)
(Valable seulement si le cachet de l'USDA apparaît sur le N° du certificat)

identification (metallic USDA Tag) which would allow for proper epidemiological investigation of a case of BSE should one ever be detected. U.S. regulations prohibit the feeding of ruminant meat-and-bone meal and greaves to ruminants. / Aucun cas d'ESB n'a jamais été détecté aux Etats Unis. La déclaration de l'ESB est obligatoire aux Etats Unis et le pays possède un système efficace de surveillance de cette maladie. Les bovins portent une marque d'identification ce qui permet une investigation épidémiologique convenable si jamais un cas d'ESB est détecté. La réglementation aux Etats Unis prohibe l'utilisation de farines de viandes et d'os ou de creton chez les ruminants ;

C. The artificial insemination (AI) center at which the semen was collected is under the direct supervision of a USDA-accredited veterinarian, is inspected at least once a year by a USDA veterinarian, and meets the disease control standards of Certified Semen Services or equivalent. / Le centre d'insémination artificiel à partir duquel sont collectées les semences est sous la supervision d'un vétérinaire accrédité par l'USDA, et il est inspecté au moins une fois par an par un vétérinaire de l'USDA, et répond aux normes des Services des Semences Certifiés ou équivalent, en matière de contrôle des maladies.

D. The AI center at which the semen was collected is free of tuberculosis and brucellosis. / Les centres d'insémination artificielle dont proviennent les semences sont indemnes de tuberculose et de brucellose.

E. The resident herd at the AI center at which the semen was collected consists solely of bulls that were tested immediately prior to entry and found negative for Tuberculosis, Brucellosis, Campylobacteriosis, Trichomoniasis, and Bovine Virus Diarrhea (BVD) virus infection. / Le troupeau implanté dans le centre d'insémination artificiel où est réalisé la collecte des semences comprend uniquement des taureaux ayant fait l'objet, immédiatement avant leur entrée au centre, de tests avérés négatifs vis à vis de la tuberculose, de la brucellose, de la campylobactériose, de la trichomonose, et de l'infection par le virus de la diarrhée bovine (BVD).

F. The resident herd at the AI center at which the semen was collected displayed no clinical evidence of Tuberculosis, Brucellosis, Campylobacteriosis, Trichomoniasis, BVD, Bluetongue, Infectious Bovine rhinotracheitis/Infectious Pustular Vulvovaginitis (IBR/IPV), Enzootic Bovine Leukosis (EBL), or Leptospirosis in the 6 months prior to collection of the semen for export. / Les animaux du troupeau du centre d'insémination au niveau duquel la semence est prélevée n'ont montré aucun signe clinique de Tuberculose, de Brucellose, de Campylobactériose, de Trichomonose, de BVD, de Bluetongue, de l'IBR/IPV, de Leucose ou de Leptospirose durant les six derniers mois précédents la collecte de sperme pour l'exportation.

G. All donor bulls were born and raised in North America and at the time of collection of the semen for export had been in the United States for at least 3 months and were in the resident herd at the AI center. / Les taureaux donneurs des semences pour l'export sont nés et élevés en Amérique du Nord, et ont séjourné aux Etats Unis dans le centre d'insémination au moins trois mois avant le moment de la collecte des semences.

H. All donor bulls were in good health at the time of collection and showed no clinical signs or lesions (including genital lesions) of any contagious disease, including those diseases listed in Statement F above. / Les semences proviennent de taureaux en bonne santé et n'ont présenté, au moment de la collecte du sperme, aucun signe clinique ou lésion (incluant les lésions génitales) de maladie contagieuse y compris les maladies citées au paragraphe F. ci-dessus;

I. All donors bulls were/are free of the Bovine Leukocyte Adhesion Deficiency (BLAD) and Complex Vertebral Malformation (CVM) genes. / Tous les taureaux donneurs étaient/sont indemnes des gènes du B.L.A.D (Bovine Leukocyte Adhesion Deficiency) et du C.V.M. (Complex Vertebral Malformation);

J. The semen has been stored frozen for at least 28 days prior to export. It was treated and has been stored in a manner consistent with that prescribed in the OIE International Animal Health Code, and each dose is labeled as to the date of collection, donor ID and breed, and name and code number of the AI center. It is stored and transported in a sealed container. / Les semences ont été stockées congelées pendant au moins 28 jours avant leur exportation.

2/4
57

Health Certificate No/ Certificat sanitaire N°: _____
 (Valid only if the USDA Veterinary Seal appears over the Certificate No.)
 (Valable seulement si le cachet de l'USDA apparaît sur le N° du certificat)

Les semences destinées à l'export sont traitées et stockées dans des conditions sanitaires conformes aux normes zoo-sanitaires O.I.E. Chaque dose porte les indications relatives à la date de la collecte, à l'identification et la race du donneur ainsi que le nom et le code du centre d'insémination. Les semences sont stockées et transportées dans un conteneur scellé;

K. All donor bulls: have never been used for natural service OR have only mated virgin heifers OR were kept in an AI center where no case of bovine genital campylobacteriosis or trichomoniasis has been reported. [Indicate the applicable phrase(s)] / Les semences proviennent de taureaux qui n'ont jamais été utilisés pour la monte naturelle OU n'ayant sailli que des génisses vierges OU ayant été maintenu dans un centre de IA où aucun cas de Campylobacteriose ni de Trichomonose n'a jamais été déclaré (indiquer l'option retenue);

IX. TESTING

The following tests were conducted on the donor bulls, with negative results. Except as noted and as allowed/directed, the tests were performed on the respective donor bulls within 6 months before or after collection of the semen. All serological and microbiological tests were conducted at USDA-approved laboratories. / Les tests suivants sont réalisés sur les taureaux donneurs avec résultats négatifs. Sauf indication particulière, les tests sont réalisés sur les donneurs au cours des six mois qui précèdent ou suivent la collecte des semences. Tous les tests sérologiques ou microbiologiques sont réalisés par un laboratoire agréé par l'USDA.

Disease/maladie	Test / Test utilisé	Bull No and Test Date / N° taureau et date du test
